Amendments to the Claims

- 1. (Original) A pad base for endermism comprising a minute needle installed upright on a skin side of a patch base for skin, wherein at least the minute needle is composed of a biodegradable resin and comprises a hollow center of axle portion in which an administering drug can be filled, or is composed of a mixture of a biodegradable resin and an administering drug and comprises a hollow shape or a solid-core shape.
- 2. (Original) The pad base for endermism according to Claim 1, wherein the minute needle has an outer diameter of 20 μ m or more and 500 μ m or less, an inner diameter of 10 μ m or more and 490 μ m or less and a length of 100 μ m or more and 1 mm or less.
- 3. (Currently amended) The pad base for endermism according to Claim 1 or 2, wherein the biodegradable resin is polylactic acid or a copolymer of lactic acid and glycolic acid.
- 4. (Currently amended) The pad base for endermism according to any one of Claims 1 to 3 Claim 1, wherein the minute needle and the patch base are integrally made from the same material.
- 5. (Currently amended) The pad base for endermism according to any one of Claims 1 to 4 Claim 1, wherein the administering drug is filled in the hollow center of axle portion of the minute needle.
- 6. (Original) An injection needle, wherein at least a needle portion of the injection needle is composed of a biodegradable resin or composed of a mixture of a biodegradable resin and an administering drug.

- 7. (Original) The injection needle according to Claim 6, wherein the biodegradable resin is polylactic acid or a copolymer of lactic acid and glycolic acid.
- 8. (New) The pad base for endermism according to Claim 2, wherein the biodegradable resin is polylactic acid or a copolymer of lactic acid and glycolic acid.
- 9. (New) The pad base for endermism according to Claim 2, wherein the minute needle and the patch base are integrally made from the same material.
- 10. (New) The pad base for endermism according to Claim 3, wherein the minute needle and the patch base are integrally made from the same material.
- 11. (New) The pad base for endermism according to Claim 2, wherein the administering drug is filled in the hollow center of axle portion of the minute needle.
- 12. (New) The pad base for endermism according to Claim 3, wherein the administering drug is filled in the hollow center of axle portion of the minute needle.
- 13. (New) The pad base for endermism according to Claim 4, wherein the administering drug is filled in the hollow center of axle portion of the minute needle.
